

SMART MOBILE DEVICES

REMOTE GRAPHICS AND CONTROL

KEEP OPERATORS ADDING VALUE AT THE TOOL

PRODUCT DESCRIPTION

Android mobile devices are full-featured remotes that provide full control of LASERGUIDE and LASERVISION systems from the tool. Each control computer supports up to 8 handheld or tablet devices, and each device enables independent control of work instructions.

FEATURES AND BENEFITS

Graphic display of full work instructions

- Eliminates step-away time, keeping operators at the tool adding value
- Guides operators via electronic ply books with color graphics

Full control of build sequence, including non-layup tasks

- Ensures correct steps are taken in the correct sequence
- Governs complete debulks at correct vacuum pressure

Electronic login and buyoffs on the device

- Eliminates additional step-away time
- Automates team member documentation

Support of 8 mobile devices on a single computer

- Enables multiple team members on same project
- Supports multiple projects from same controller
